OBJECTIVE

Aspiring Software Engineer with strong skills in full-stack web development and problem-solving. Seeking an entry-level role or internship to build scalable applications and contribute to impactful, real-world solutions.

EDUCATION

Babu Banarasi Das University — Lucknow, India
Bachelor of Technology in Computer Science & Engineering (Pursuing) — Expected: June 2027
CGPA: 8.79 / 10 (Cumulative score up to 3rd Year)

Divine Sainik School (CBSE) — Varanasi, India
Intermediate (Class XII) – ***Percentage: 78.2%*** — 2022

RNP Public School (CBSE) — Saran, Bihar, India
High School (Class X) – ***Percentage: 74.8%*** — 2020

INTERNSHIP

CodSoft — Remote
Web Developer Intern (1 Month)

- Independently architected and executed multiple frontend projects in a self-managed remote setting.
- Built a functional Spotify Clone featuring a responsive user interface and core music player playback controls.
- Implemented modern digital landing pages utilizing clean UI/UX paradigms to optimize client-side visual hierarchy.
- Engineered fluid web components and interface functionalities natively using HTML, CSS, and modern JavaScript.

TECHNICAL SKILLS

- **Programming Languages:** C, Java (DSA Basics), Python, JavaScript
- **Web Development:** HTML5, CSS3, React.js, Node.js, Express.js
- **Databases & Tools:** MySQL, Git, GitHub, MS Excel
- **Data Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib
- **AI Tools & Platforms:** Claude, Antigravity, Google AI Studio
- **Core Computer Science:** Data Structures & Algorithms (DSA Basics), Object-Oriented Design

PROJECTS

LegalDoc AI: AI-Based Legal Automation Platform — *React.js, Node.js, Groq API*
Live Deployment Link

- Built a full-stack AI application engineered to automate the generation, auditing, and structural analysis of legal documents.
- Implemented complex workflows for automated contract generation, compliance checkpoints, and interactive AI consultation.
- Integrated Groq API to achieve fast generative response speeds, minimizing system processing latencies.
- Developed client-side PDF exporting mechanisms alongside native multi-language rendering support for English and Hindi.

AI-Based Food Wastage Detection System — *Python, Image Processing*
Live Deployment Link

- Developed an AI-powered system designed to analyze and detect complex food wastage volumetric patterns via image processing.
- Built a responsive analytical frontend monitoring interface to manage data metrics and live telemetry streams seamlessly.
- Tuned internal computer vision algorithms to achieve optimal load times, balancing execution accuracy with computational speeds.

ACHIEVEMENTS & CERTIFICATIONS

- **Career Essentials in Software Development** – Microsoft & LinkedIn Learning (Foundational software systems).
- **AI Workshop Attendee** – Google Developer Group (GDG) Lucknow (Ecosystem updates and developer tools).
- **AI Tools Workshop Certification** – Be10x
- **Soft Skills Training Program Certificate** – Learnovate Enterprises

EXTRACURRICULAR ACTIVITIES

- **Assistant Student Coordinator** – IBM Club, Babu Banarasi Das University

SOFT SKILLS

- Teamwork & Collaboration · Problem Solving · Communication Skills · Leadership & Team Management
